

FIGURE 2

Participant impressions of the STEMFI workshop taken from a survey administered at the end of the workshop.

I found most of the strategies presented to be relevant to the course that I teach.

Meeting sessions were taught using student-centered approaches.

I have a good sense of what many of these teaching techniques look like in the classroom.

I gained a broad perspective of teaching techniques through the diversity of topics presented.

The overall quality of the workshop exceeded that of other professional development workshops I have attended.

■ Somewhat disagree ■ Neither agree nor disagree ■ Somewhat agree ■ Agree ■ Strongly agree

Note. These survey items were administered on a 7-point Likert scale. The categories *disagree* and *strongly disagree* were not selected and were left out of the figure for simplicity.
