How do humans use water?

What are the ways that water is found at different locations?

Water is life story card

The water here is frozen and snowflakes fall.

Water is life story card

Water here is collected for people in the village or local area to use.

Water is life story card

We find that we can move different places on the water as we try and catch fish for food.

Water is life story card

Water falls from the sky and helps plants to grow.

Water is life story card

Water helps trees, plants, and animals alive.

Water is life story card

Food that we grow needs water.

Water is life story card

Sometimes water comes in large amounts, all at once.

Water is life story card

At times, we need to bring water to different places so that it is available for people and animals.
