Wearable Matrix

Criteria	Exemplary	Competent	Emerging	Beginning
Addresses Objective	Wearable addresses problem of paper pollution in great depth.	Wearable partly addresses problem of paper pollution.	Wearable inaccurately addresses problem of paper pollution.	Wearable does not address paper pollution.
Meets Constraints:	Met all three constraints.	Met two constraints.	Met one constraint.	Did not meet constraints.
Originality	Prototype is an original idea/enhances an existing wearable by its name, feature(s), and function(s).	Prototype is an original idea/enhances an existing wearable by its name and key feature.	Prototype has an original name but is exactly like existing wearable(s).	Prototype bears the same name and features of an existing wearable.
Retains structure when worn	Wearable kept its structure when worn for up to six hours or more.	Wearable kept its structure when worn for up to one hour.	Wearable kept its structure when worn for less than one hour.	Wearable did not keep its structure (immediately fell apart).
