Station #1: Which animal made that sound?

An animal that made a loud sound is ______________________________

It was LOUDER than ______________________________ which

made a soft sound

I think the ______________________________ made a high

sound. The ______________________________ made a low

sound.
Station #2: How close is the sound?

When the fire engine drove **towards us** the sound became louder softer.

Thunder happened during the storm. When the storm from us, the sound of the thunder became louder softer.

The train sound became louder as it

The sound of the geese was softer as they flew
Station #3: Sound Creates Vibrations

What do you notice about the water when the tuning fork was placed near it? Sketch your observations

Sketch what happened to the rice when the drumstick was used on the drum.
What happened to the rice in the pie pan on the speaker when the volume was soft?

when the volume was loud?
My Favorite Sound

_________________________________________,
_________________________________________________, and
_____________________________________________.

It is ____________________________________________________.

Draw a picture of what makes your favorite sound.
