

Darkness at Night

Six friends were wondering why the sky is dark at night. This is what they said:

Jeb: The clouds come in at night and cover the Sun.

Talia: Earth spins completely around once a day.

Nick: The Sun moves around Earth once a day.

Becca: Earth moves around the Sun once a day.

Latisha: The Sun moves underneath Earth at night.

Yolanda: The Sun stops shining.

Which friend do you think has the best reason for why the sky is dark at night?
_____ Describe your ideas about why Earth is dark at night and light during the day.
