

Objects in the Sky

Different things can be seen in the sky, using only your eyes.

Put a **D** next to the things that are seen **only** in the daylight.

Put an **N** next to the things that can be seen **only** at night.

Put a **B** next to the things that can be seen in **both** the daylight and at night.

___ clouds

___ the Sun

___ the Moon

___ stars (not including the Sun)

___ the planet Venus

___ the planet Saturn

Explain your thinking.
