

Solids and Holes

Lance had a thin, solid piece of material. He placed the material in water and it floated. He took the material out and punched holes all the way through it. What do you think Lance will observe when he puts the material with holes back in the water? Check off your prediction.

- A.** It will sink.
- B.** It will barely float.
- C.** It will float the same as it did before the holes were punched in it.
- D.** It will neither sink nor float. It will bob up and down in the water.

Explain your thinking. Describe the “rule” or reasoning you used to make your prediction.
